

**ASTSA** :<http://www.stat.pitt.edu/stoffer/tsa2/>

ASTSA is a Windows time series package that is distributed as Freeware and is provided As is without warranty of any kind, either expressed or implied. ASTSA may not be distributed as a component of any commercial product without a prior license agreement with the authors. If you do not agree with these terms, do not download the program. If you have questions about ASTSA, please contact RHS. Just so you know, ASTSA was written in Visual Basic 3, so it's a 16-bit application (think Windows 3.1). It seems to have held up and runs on XP with high probability. It's anyone's guess if it will run on Vista. ASTSA hasn't been supported for a long time, and there won't be any updates.

To install ASTSA, download **ASTSAsetup.exe** (less than 1 mb) to your desktop and run the setup program.

If you prefer, you can get ASTSA in a zipped archive: **astsa.zip**. Just download **astsa.zip**, unzip it to a convenient location, and put a shortcut to **astsa.exe** on your desktop and/or your start menu.

You can uninstall the program by simply deleting the ASTSA directory and any shortcuts that were created. **ASTSAsetup** puts one shortcut on the desktop and another on the Start-Programs menu.

You might also want the ASTSA manual. Many of the data sets used in the text are included with ASTSA - [click here](#) for details.
